HOW TO WASH YOUR HANDS IN 9 STEPS

Question 1

What if the water at **this TAP** no longer was safe and not of drinking quality?

Question 2

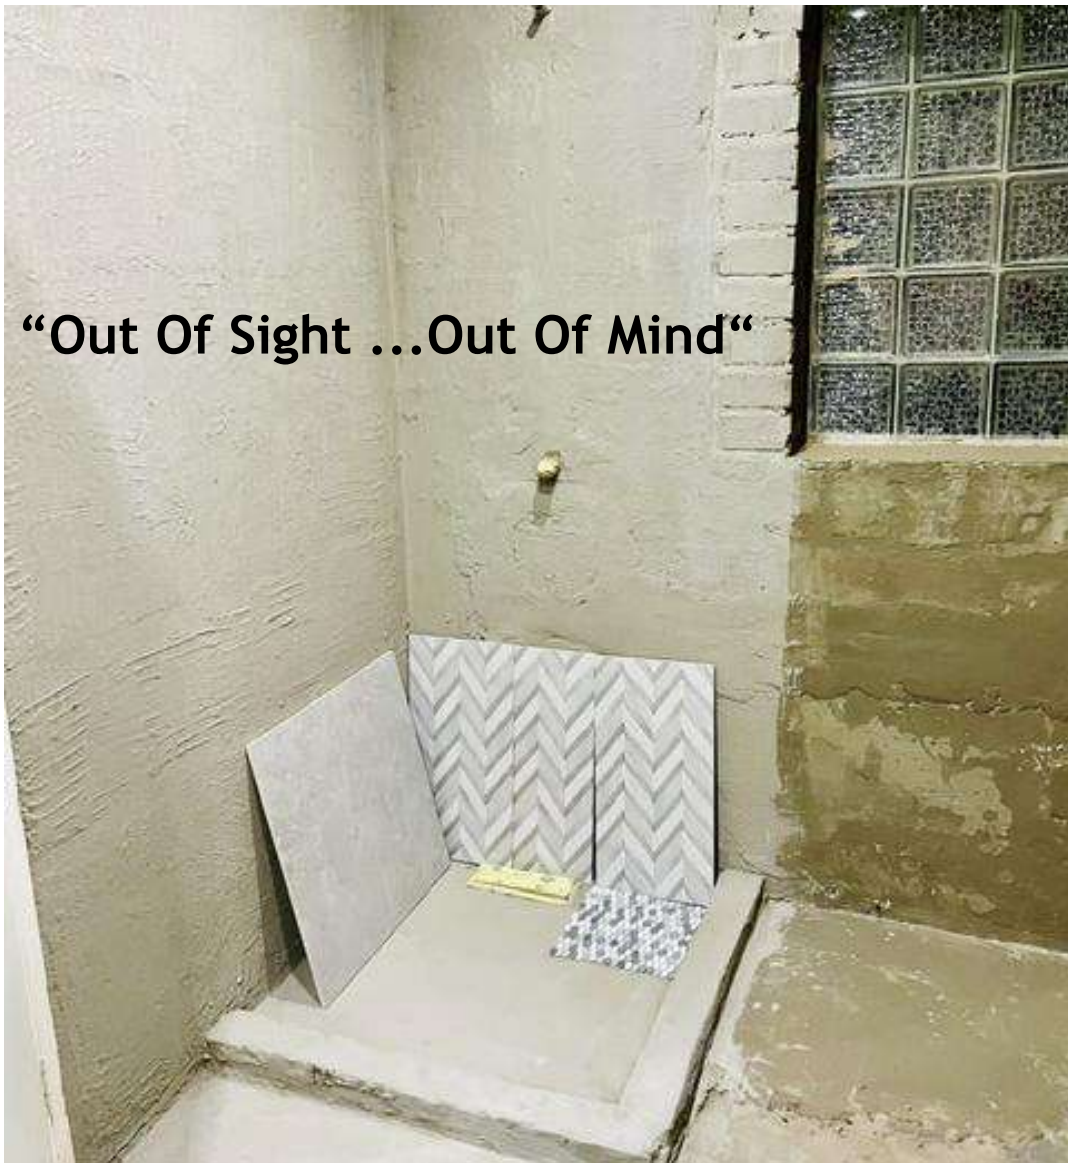

Could the drinking water quality have been altered or changed along its journey through the plumbing pipes, fittings and components used to get the **water to this Tap**?

Question 3

How would I know if the water I am using to wash and rinse my hands (**Step 8**) was not contaminated and further compromising health and safety?

“Out Of Sight ...Out Of Mind“

Early Failure / Leaks

Galvanic Action / Dissimilar Metals / Leaching

Bio-Film

NON-COMPLIANCE
